

The FAA Safety Team presents:

Tackling the Tailwheel

During Fiscal Year 2014 the Allentown Flight Standards District Office (FSDO) saw a dramatic increase in the number of Tailwheel Accidents from previous years with over 50% caused by loss of control during landing. If you are considering flying Tailwheel Aircraft or are currently flying them, please come and join in the discussion. Our speaker Brian Moor, CFII will cover some of the operational and handling differences between tailwheel and tricycle gear aircraft, with the goal of reducing accidents through education and the promotion of continual training. The Philadelphia Glider Council will be having a cookout immediately after the seminar. Please click on the link below to register for this fun event!!! Also a shuttle will be provided from CKZ if you desire to fly to the event, see additional information for details!

Directions: Please see map link for directions, seminar will be held in Hangar

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
